TITLE INDEX

Analysis of the logistic system of steel products in Poland, 47
Assessing manufacturing system performance: Frequency response revisited, 319
Case study in cyclic assembly planning and dynamic coordinated component shops' loading in a locks manufacturing plant, a, 115
Computer-aided disposition of the reserve of spare parts, 133
Credit, imports and inventories in CPEs; causality test for the causality test for the Hungarian economy, 11
Criteria of inventory pricing, 175
Cross-national comparison of production-inventory management practices, 149
Decreasing expected shortages through order splitting, 351
Delay of payments vs. price discounts for extraordinary purchases: The buyer's perspective, 273
Determination of cost parameters to achieve optimum stockpiling, the, 25
Disaggregating aggregate production plans to smooth workload variation, 125
Distribution of an additive in a chemical process: An application of input-output theory, the, 333
Dynamic energy production model, a, 375
Dynamic multi-location inventory model with contingents and redistribution of rest stock, a, 359
Eclectic algorithm for inventory replenishment for items with increasing linear trends in demand, an, 261
Economic consequences of non-optimal inventory holdings in India and Iran – An integrated linear programming and input–output approach, 73
Economic order quantity and storage size – Some considerations, 201
Employment policy for an inventory-holding labor-managed firm, 3
Equilibrium and adjustments in noncompetitive markets: Lost sales versus backlogging processes, 91
Essay on economic reforms and inventories, an, 81
Evaluation of a new type of sequential lot sizing techniques, 281
Evidence from seven countries on whether inventories smooth aggregate output, 85
Forecast horizon in convex coxst inventory model with spoilage, 371
Industrial study of the effects of batch sizes on the performance of the overall manufacturing system, an, 139
Influence of the information system on inventory mangement, 101
Impact of flexible manufacturing systems (FMS) on inventories, the, 165
Implications of the EOQ assumptions on the valuation of the average investment, 107
Input–output simulations of inventory flucturations, 57
Integrated inventory model based upon GRAI tools, an, 313
Inventory control in case of unknown demand distribution, 301
Inventory management in the manufacturing sector in developing countries, 19
Inventory model under inflation for stock dependent consumption rate items, an, 379
Inventory systems optimization for dynamic stochastic and periodical demand, 295
Materials management in service industries, 157
Medium to short term finite capacity scheduling: A planning methodology for capacity constrained workshops, 189
Microcomputer expert system for advising on stocks in spare parts inventory systems, a, 365
Models of sales expectations, 37
Multi-item production lot sizing using a search simulation approach, 307
Naddor's demand patterns and the economic order quantity under uncertainty, 327
On the choice of batch mode in order to maximize throughput, 241
Planning for CIM in Hungary: Facts about and attitudes to implementation, 229
Price discounting in multi-echelon distribution systems, 341
Reducing raw material inventories for plastic components production, 213
Risk in inventory models: Review and implementation, 267
Role of the bill of material in manufacturing systems, the, 2095
Scheduling a flexible machining centre, 249
Short-term finance and inventories, 31
Simple heuristic method for planning inventory at a coke plant, a, 183
Single and multistage production lot sizing with work-in-process inventory considerations, 287
Spare parts inventory planning for a redundant system subject to a phased mission, 385
Study of inventory structures and trends in Sweden and Finland, 65
Utilisation of information technique – The condition of reconstruction, 221
